

'Quality and Innovation is must for sustainable farming and that's our motto...'

ABOUT US

Proshine Agronutrients Pvt. Ltd. is engaged in providing standard as well cost effective nutrition to fulfil requirements of plants.

Proshine Agronutrients Pvt. Ltd. deals in 100% water soluble fertrilizers, micronutrients, Biostimulants, Probiotics and other plant growth regulators. Proshine Agronutrients Pvt. Ltd. is an emerging farm nutrition company in Maharashtra. We assume that each of our products meet the standards as per requirement of farmer and have a considtancy in quality. We have a strong dealer network spread all over Maharashtra and also have a strong network of happy Proshine farmers. This is just the beginning of the company and our vision is to serve all over country farmers best input material in terms of quality and service. Proshine is not just going as an organisation but we want to create family and everyone works towards the success of company We invite you all to be a part of Proshine family and explore the limitless world of possibilities.

- Incorporated in May 2017.
- One stop solution to all nutrients requirement of grower through wide product range of 100% water soluble Fertilizers and Biostimulants and many more exclusive ranges.
- Strong Leadership team with cross functional experience.

VISION

Our vision is to serve our Nation and our grower family the "Best input material in terms of quality & service. To be a global trusted partner in farm nutrition creating long- term value for growers and stakeholders through innovation and strong leadership.

MISION

To provide quality Agri- input products to growers through timely & consistent supply To focus on development of human resources in organization through right recruitment, training and creating best working environment To offer scientifically tested laboratory to farm solutions using cutting edge research and the latest technology and practices.

CORE VALUES

Commitment

We are committed to Stringent Quality and prompt service.

Believe

We believe in honesty, integrity, innovation and transparency to provide service to customers.

Ethics

We are committed to professional ethics and restrain ourselves from any activity that affects our customers or agriculture and thus conservation of nature as a whole.

Quality &Trust

We put our efforts in ensuring the highest quality standard through stringent methods which includes sampling & Testing

NPK-19:19:19

- ► It is a 100% water-soluble fertilizer containing all the essential plant nutrients including Nitrogen, Phos phorus and potash in equal ratio.
- ➤ We offers products which are of the best quality free flowing and easy to handle.
- ▶ It enhances the availability of macro and micronutrients in soil
- ➤ Can be used in all stages of crop, i.e. vegetative, reproductive, fruiting and maturity Can be used through both drip and foliar application.

- ► Foliar Application: 5 to 10gm/Ltr. of water.
- ► Drip Application: 3 to 5kg /acre.

Available Packing Sizes:

► 1Kg ► 25Kg

NPK-13:40:13

- ► Ideal fertilizer with all major macronutrient N-P-K
- ► High Phosphorous grade
- ▶ Recommended for flowering and fruiting stage specially for flowering enhancement
- Can be used through both drip and foliar application

Dose:

- ► Foliar Application: 5 to 10 gm/Ltr. of water.
- ► Drip Application: 3 to 5kg /acre.

Available Packing Sizes:

► 1Kg ► 25Kg

NPK-12:61:00

(Mono Ammonium Phosphate)

- ► Facilitates overall Root and vegetative development of the crop.
- ► Combination of nitrogen & Phosphorous.
- ► Ensures proper flower setting and bud initiation in crops.
- ► Can be used through both drip and foliar application.

Dose:

► Foliar Application : 5 to 10gm/Ltr. of water.

► Drip Application : 3 to 5kg /acre.

► 1Kg ► 25Kg

NPK-00:52:34

(Mono Potassium Phosphate)

- ► Combination of phosphorous & potassium.
- ► This fertilizer improves fruit quality, colour and size.
- ► Facilitates overall Root and fruit development of the crop.
- Ensures proper flower initiation and fruit setting.
- Can be used through both drip and foliar application.

Dose:

► Foliar Application: 5 to 10 gm/Ltr. of water.

► Drip Application: 3 to 5kg /acre.

Available Packing Sizes:

▶ 1Kg ▶ 25Kg

NPK-00:00:50

(Potassium Sulphate)

- ► High potassium based grade, also contains Sulphur.
- ► Highly recommended for fruiting & maturity stage of the crop.
- ► Enhances fruit size, fruit appearance and fruit weight.
- ► Enhances Brics value of the crop increasing overall sugar content.
- Can be used through both drip and foliar application

- ► Foliar Application: 5 to 10gm/Ltr. of water.
- ▶ Drip Application : 3 to 5kg /acre.

► 25Kg

NPK-13:00:45

(Potassium Nitrate)

- ► Unique combination of potassium & nitrogen
- ► Facilitates overall Root and Shoot development of the crop
- ► Can be used in all stages of crop, i.e. vegetative, reproductive, fruiting & maturity
- Highly recommended for fruit setting of crop
- Can be used through both drip and foliar application

Dose:

- ► Foliar Application: 5 to 10gm/Ltr. of water
- Drip Application: 3 to 5kg /acre.

Available Packing Sizes:

► 25Kg

CALCIUM NITRATE

- ► Unique combination of calcium and nitrogen
- ► Facilitates cell division and stabilizes cell membrane which helps to avoid fruit cracking
- Provides tolerance against fungal infections and toxins, thus avoiding rottening of fruits
- ▶ Recommended to be used at fruiting and maturity stage of the crop
- Can be used through both drip and foliar application

Dose:

- ► Foliar Application: 5 to 10gm/Ltr. of water
- ▶ Drip Application : 4 to 5kg /acre.

Available Packing Sizes:

▶ 25Kg

MICRONUTRIENTS

ULTRABOR

- ► It contains 20% boron, a micronutrient essential for crop growth.
- Ultrabor helps for overall growth & development of the plant.
- ► Ultrabor helps cell wall strengthening and development, cell division, fruit and seed development, sugar translocation & hormone synthesis.
- ▶ Boron has a significant effect in pollen germination & pollen tube growth.
- ► Ultrabor decreases the drop of buds & flowers, resulting in significant improvement in seed & fruit set & also in the quality of fruits, seeds, nuts etc.
- ▶ Boron maintains calcium in soluble form & thus ensure its proper utilization.
- ► Foliar applied Boron is rapidly absorbed by the leaves & flower buds giving maximum benefits.

Dose:

Foliar Application: 2 to 3 gm / ltr of water.

Drip application. 1to 2 kg / acre.

Available Packing Sizes:

▶ 1Kg ▶ 500gm

CHELATED ZINC

- ➤ Zinc is crucial for plant hormone balance and auxin activity.
- ► It is vital for growth division of cell and production of husks of grains.
- ➤ Zinc plays a very important role in yield quality.

Dose:

- ► Foliar Application : 1gm/ Ltr. of water.
- ▶ Drip Application : 1 to 2gm /acre.

Available Packing Sizes:

▶ 250gms ▶ 500gms

CHELATED CALCIUM

- ► It Corrects Calcium deficiency in crop.
- ► It increases immunity of crop.

Dose:

► Foliar Application: 1gm/ Ltr. of water.

Available Packing Sizes:

► 250gms **►** 500gms

CHELATED MIX-COMBI

- ► It is a EDTA chelated micronutrient mixture specially designed for foliar spray as well as drip application.
- ► Use of mix-combi increases quality of yield.
- ► It reduces yellowing of leaves and flower and fruit drop.

Dose:

► Foliar Application : 1gm/ Ltr. of water.

Available Packing Sizes:

▶500gms ➤ 250gms

MICROBOOST

- ► It is a micronutrient mixture in liquid form specially designed as per Maha Govt Grade-II norms.
- ► It increases overall health of crop making plant disease free and disease resistant.
- ► Shading of leaves, flowers and fruits is controlled
- ► All elements in microboost gets easily absorbed by plants when applied through drip irrigation.

Dose:

► Drip Application: 2 to 3 Ltr /acre.

Available Packing Sizes:

▶ 1Ltr ▶ 5Ltr ▶ 20 Ltr

PANCHATAVA-DF

- It is a micronutrient mixture in powder form specially designed as per Maha Govt Grade-I norms.
- ▶ It increases overall health of crop making plant disease free and disease resistant.
- ► Shading of leaves, flowers & fruits is controlled
- All elements in microboost gets easily absorbed by plants when applied through drip irrigation

Dose:

▶ Drip Application 2kg/ acre.

Available Packing Sizes:

► 2Kg ► 5Kg

PLANT GROWTH REGULATORS PRODUCTS (PGR)

ROOT DEVELOPER

- ► Root Developer is a very high quality organic product.
- ► Use of root Developer stimulates faster growth of roots.
- ▶ Root Developer can be used for foliar as well as drip application

Dose:

- ► Foliar Application: 1 to 1.5 gm/ltr of water.
- ► Drip Application : 500gm to 1kg per acre.

Available Packing Sizes:

► 500gms

AMIGRO

- ► It consists of Amino Acid 40% And other essential nutrients.
- ► It stimulates flower setting in crop.
- ► Use of Amigro results in higher yield by plants when applied through drip irrigation

Dose:

- ► Foliar Application: 2 ml/Ltr of water.
- ▶ Drip Application : 2 Ltr/acre.

Available Packing Sizes:

▶ 1 Ltr.

BLOOSOM

- ► It consist of flower stimulating agent.
- ► It increases overall vegetative growth of plant and flower count.
- ► Results in higher yield & quality production.

Dose:

- ► Foliar Application: 2 to 5 ml/ltr of water.
- ► Drip Application: 2 to 3 Ltr /acre.

Available Packing Sizes:

▶ 1 Ltr ▶ 5 Ltr

AVISHKAR

- Avishkar is a Concentrated biostimulant mixture derived from various ingredients like Amino acids, Herbal extracts, seaweed, Minerals & other promoters.
- ► It helps plant for photosynthesis, development of leaves, flowers and fruits.
- ► It helps to reduce flower dropping and helps in fruit setting in adverse climatic conditions.
- ► It increases quality and yield of crop.
- eld by plants when applied through drip irrigation.

Dose:

► Foliar Application: 0.25 ml/Ltr of water.

▶ 100ml ▶250ml

N APEX

- ► APEX encompasses all small secreted peptides that are involved in cell-to-cell signaling.
- ► These small pesticide hormones play crucial roles in plant growth and development.
- ► Including defense mechanisms.
- The control of cell division and expansion.

Dose:

► Foliar Application : 1 to 1.5ml/Ltr of water.

Available Packing Sizes:

≥250ml ► 100ml

SILICO

- ➤ Silicon is a most essential nutrient to reduce stress conditions of crop.
- ► It imporoves resistance of plants from stress, and other biological attack.
- ► It also stimulates process of photosynthesis, vegetative growth ,flowering and fruit production.

Dose:

► Foliar Application: 3 gm/Ltr of water.

Available Packing Sizes:

▶ 250gms ▶ 500gms

BIOFERTILIZERS

BIO SPEED

- Biospeed Contains 17-18 free flowing amino acids that have been derived from naturally available organic substances of plant origin.
- ► Biospeed is an excellent All rounder crop enhancer.
- Biospeed induces fruit and flower development of crop
- ► It increases power of beneficial harmone in plants.

Dose:

► Foliar Application :1ml per ltr. of water.

Available Packing Sizes:

▶ 250ml ▶ 500ml

These Bacteria live freely in the root zone of sugar loving crops.

► Tese microbes have capacity to FIX Atmospheric Nitrogen in the soil & make it available to the plants.

► They perform these activities in soil which is rich in organic matter.

It releases Vitamin B & improves soil aggregation.

▶ Besides fixation of nitrogen it also promotes growth of Various beneficial acids, gibralins, endole acetic acid.

► CFU Count: 1x10 ^ 9/ml. min.

Dose: Modes of Application:

Seed Treatment, Soil Application, Drenching, Drip Application.

▶ 1 to 2 Ltr/ acre.

Available Packing Sizes:

▶ 1 Ltr.

PRECISE P:

Phosphorous Solublizing Bacteria

Precise P contains strong concentration of phosphorous Solublizing bacteria.

These bacteria when applied to soil works very rapidly.

These Bacteria can produce organic acids & enzymes ,by virtue of this they act on the locked phosphorous Sources in soil & solublize it into available form.

Precise P is a combination of several phosphorous solublizing microbial flora.

These microbes makes phosphorous available to the plants for easy uptake.

► CFU Count: 1x10 ^ 9/ml. min.ibralins, endole acetic acid.

Dose: Modes of Application:

Seed Treatment, Soil Application, Drenching, Drip Application.

▶ 1 to 2 Ltr/ acre.

Available Packing Sizes:

▶ 1 Ltr.

PRECISE K :

Potash Mobilizing bacteria

- ► It contains potash mobilizing bacteria.
- ► The bacterias containing in Precise K promotes potash Availability and conductivity.
- These bacterias make the potash in unavailable form in soil to the available form.
- It increases disease resistance in crops and drought tolerance.
- Enhances shelf life of produce.
- It improves the quality of fruits and grains.
- ► CFU Count: 1x10 ^ 9/ml. min.

Dose: Modes of Application:

- Seed Treatment, Soil Application, Drenching, Drip Application.
- ▶ 1 to 2 Ltr/ acre.

▶ 1 Ltr.

PRECISE TRICHO

Trichoderma veridae

- ▶ Precise-Tricho is eco friendly biological fungicide containing Trichoderma Viride.
- Trichoderma viride controls growth of plant pathogenic fungi.
- ► It protects against pathogens causing diseases in plants like Collar rot, Root rot, Dry rot etc.
- It also produces antibioticsin soil.
- ► CFU Count : 1x10 ^ 8/ml, min.

Dose: Modes of Application:

- Seed Treatment, Soil Application, Drenching, Drip Application.
- 1 to 2 Ltr/ acre.

Available Packing Sizes:

▶ 1 Ltr.

Quality Beyond Imagination
